FLOOR STANDING TYPE  
DUCT TYPE

Perfecting the Air

- Ask a qualified installer or contractor to install this product. Do not try to install the product yourself. Improper installation can result in water or refrigerant leakage, electrical shock, fire or explosion.
- Use only those parts and accessories supplied or specified by Daikin. Ask a qualified installer or contractor to install those parts and accessories. Use of unauthorised parts and accessories or improper installation of parts and accessories can result in water or refrigerant leakage, electrical shock, fire or explosion.
- Read the user's manual carefully before using this product. The user's manual provides important safety instructions and warnings. Be sure to follow these instructions and warnings.
- About harmonics, since this product is equipped with an inverter, harmonics will be generated. If local laws require the suppression of harmonics on the building, please take harmonic suppression measures on the electrical equipment side. Please contact your local sales company for details.

If you have enquiries, please contact your local importer, distributor and/or retailer.

DEALER RESMI

### Cautions on product corrosion

1. Air conditioners should not be installed in areas where corrosive gases, such as acid gas or alkaline gas, are produced.
2. If the outdoor unit is to be installed close to the sea shore, direct exposure to the sea breeze should be avoided. If you need to install the outdoor unit close to the sea shore, contact your local distributor.

### Jam Beroperasi:

Senin - Jumat: 07:00 - 19:00 WIB

Sabtu - Minggu & Libur Nasional: 07:00 - 17:00 WIB

### DIRECT AIR BLOW

#### Direct air blow from indoor unit with plenum

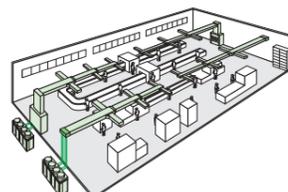

- Comfortable factory air conditioning using multiple indoor units installed in accordance with the space.
- Installation is next to walls, so units will not affect the factory layout even if the changes are made.

### DUCT CONNECTION / DUCT TYPE

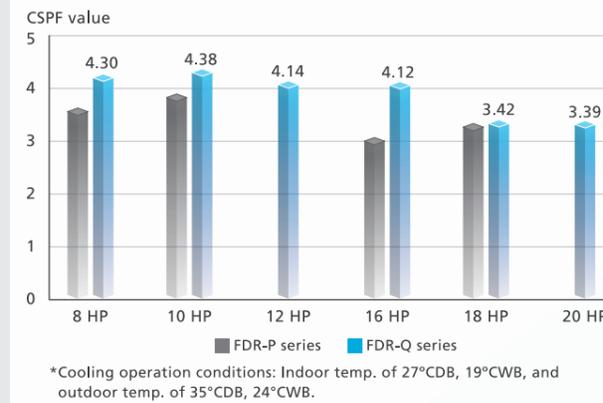

#### Air blow via connected ducts

- Comfortable air conditioning of the entire factory by connecting a blow duct at the top of the indoor unit.
- Note: Ducts to be procured locally.

## Energy saving

### CSPF improvement

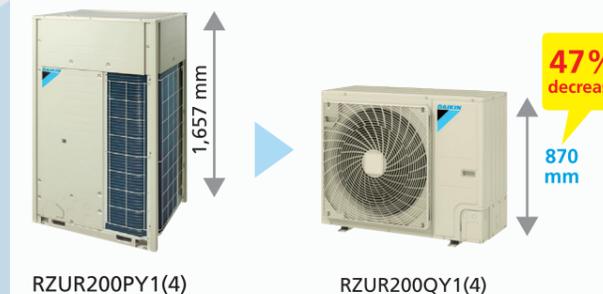

FDR-Q series provides greater energy saving due to higher CSPF\* as compared to FDR-P series.

\*CSPF: cooling seasonal performance factor

**33.8%**  
increase  
(for 16 HP)

## Design flexibility

### Compact & lightweight design

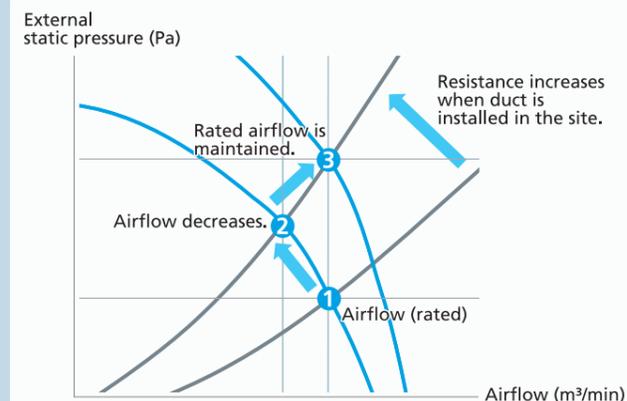

- Ideal solution that minimises both visual and sound impact
- Can be installed in a wide variety of locations and applications

The new design has been optimised for the RZUR200QY1(4) with the height reduced to only 870 mm.

This low height casing design provides occupants with a clear, unobstructed view of the scenery.

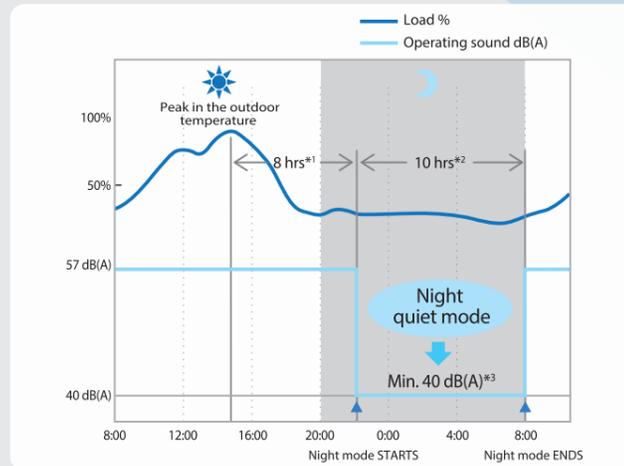

### Automatic adjustment of external static pressure

The RZUR200QY1(4) model has the external static pressure automatic adjustment function for maintaining the rated airflow and capacity by automatically adjusting the external static pressure during the test operation to suit the resistance of the installation site.

# Comfort

## Nighttime quiet operation function

The nighttime quiet operation function automatically suppresses the nighttime operating sound by reducing operation capacity to maintain the quiet environment of the neighborhood. Three selectable modes are available depending on the required level.

- \*1. Initial setting is 8 hours. Can be selected from 6, 8 and 10 hours.
- \*2. Initial setting is 9 hours. Can be selected from 8, 9 and 10 hours.
- \*3. In case of RZUR250QY1(4).

Notes: • This function is available in setting at site.  
• The operating sound in quiet operation mode is the actual value measured by our company.  
• The relationship of outdoor temperature (load) and time shown above is just an example.

# Reliability

## Backup operation function

**Compressor backup operation function**

**Emergency operation**

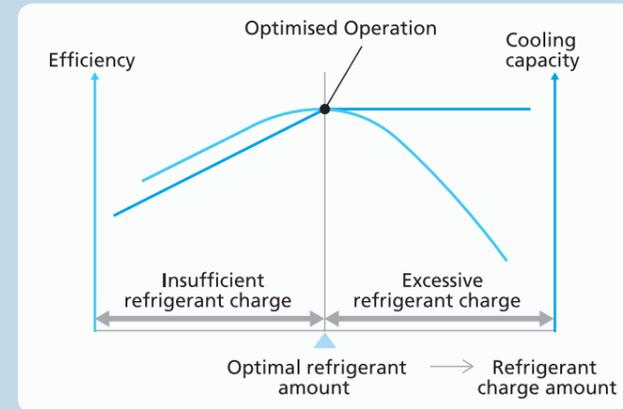

**Malfunction**

\* For RZUR300-500QY1(4) models. On-site settings are required using the PCB of the outdoor unit.

# Automatic refrigerant charge function

Contribute to optimised operation efficiency, higher quality and easier installation.

## Optimised operation efficiency

This function prevents a capacity shortage or energy loss due to excessive or insufficient refrigerant.

## Higher quality and easier installation

- 1 Calculation of necessary refrigerant amount from design drawing
- 2 Start of automatic refrigerant charge operation

**Automatic Refrigerant Charge**

- Automatic completion by proper refrigerant amount
- Monitoring refrigerant charging is unnecessary
- No recalculation of charge amounts due to minor design changes locally

The automatic refrigerant charge function automates the charging of the proper refrigerant amount and easy start by pressing one button.

- \* There are conditions in the range of ambient temperature in which the automatic refrigerant charge can be used. Refer to the installation manual for details.
- \* The refrigerant amount that can be automatically charged may differ from the additional refrigerant amount that is provided from calculations, but there are no problems in performance and quality.

## Centralized management system extension

High efficiency integrated control

**Intelligent Touch Manager**

Lighting and ventilation control, energy use can be monitored and managed by one controller.

**Intelligent Touch Manager**

10.4 inch width touch screen

Centralized management can integrate with D-BACS system with high speed data transfer.

Centralized control is now available when using with Inverter packaged air conditioners.

Display of air filter cleaning times and self-inspection function for simple maintenance.

## Auto restart

Automatically turn on the operation unit after facing unexpected shut down.

## Enhanced varieties of factory modification

Factory Modification	Floor Standing Type		Duct Type

Notes :

\*1. Indoor temp.: 27°CDB, 19.5°CWB / outdoor temp.: 35°CDB, 24°CWB / Equivalent piping length: 7.5 m, level difference: 0 m.

\*2. Indoor temp.: 27°CDB, 19°CWB / outdoor temp.: 35°CDB, 24°CWB / Equivalent piping length: 7.5 m, level difference: 0 m.

\*3. Capacity are net, including a deduction for cooling for indoor fan motor heat.

\*4. Anechoic chamber conversion value, measured at a point 1 m in front of the unit at a height of 1.5 m.

\*5. The value is the external static pressure with standard pulley.

\*6. Max. 40 m if the outdoor unit is lower than the indoor unit.

## Option

### FLOOR STANDING TYPE

Option	Direct Air Blow	Duct Connection		
	FVGR200/250QV1(4)	FVPR250QY1(4)	FVPR300/400QY1(4)	FVPR450/500QY1(4)
Discharge grill plenum chamber (Including pulley and belt)	—	BPCV10Q	BPCV16Q	BPCV20Q
Filter chamber	—	BFU1B250	BFU1B400	BFU1B500

### CONTROL SYSTEM

Option	FVGR-QV1(4)	FVPR-QY1(4)	FDR-QY1(4)
Simplified remote controller	BRC2E61 (Built-in)		
Navigation remote controller	BRC1E63		
intelligent touch controller	DCS601C51		
Central remote controller	DCS302CA61		
Unified ON/OFF controller	DCS301B61		
Schedule timer	DST301BA61		
Wiring adaptor for electrical appendices (Group control adaptor) ★	KRP4AA51		
Wiring adaptor for electrical appendices ★	KRP2A61		
Remote sensor (for indoor temperature)	BRC501A-6		
Mounting plate for adaptor PCB ☆	BRP20A-3		BRP20A-1

Note :

Mounting plate ☆ is necessary for each adaptor marked ★.
